2027 GRADUATE HIRING | GROWTH ENGINEER ROLE

GROWTH ENGINEER ASSESSMENT: CHOOSE ONE OPTION

Seven-day individual assessment | 4 options | Same scoring for every option

Goal: We are hiring growth engineers who can take IncuBrix to market and scale it. Pick the one option below that best shows your strengths. Whatever you build should be ready for IncuBrix to launch right away.

1. The four options

Option	What you build	Choose this if you...
1. Lead generation and outreach	A system that finds creators who need IncuBrix, verifies them, picks the best channel for each and writes personalised outreach on at least 3 channels.	like data, automation and persuasive writing.
2. Social media and content	A social strategy, 30 ready-to-publish posts (including videos) and an AI workflow that turns one input into a week of content.	create content, understand platforms and love testing what works.
3. AEO, SEO and GEO	A visibility baseline across Google and AI assistants, validated website fixes, 10 publish-ready pages and a weekly tracker.	enjoy research, measurement and technical detail.
4. Community, training and partnerships	A community blueprint, a 4-session training program, a real pilot session with at least 15 attendees and a 50-partner pipeline.	bring people together, teach well and build relationships.

2. How it works

- Read all four option briefs, pick one and reply to the invitation email with your choice within 24 hours. You cannot switch options after that without written approval.
- You have 7 calendar days from the start time in the email. The exact deadline is in the email.
- Every option uses the same 100-point scoring: product and market insight 10, main output 35, automation and scale 20, launch readiness 10, live review 25.
- You fill in a Submission Workbook showing what you built, with a link to evidence for every claim. We verify a random sample, run your system, then hold a 45-minute live review.
- Final result: below 65 = not selected | 65-74 = hold | 75-84 = strong hire | 85+ = exceptional hire, only when all exceptional requirements also pass.

3. Rules for every option

- Use any AI tool, data source or service, free or paid. Disclose everything. No paid tool is required.
- Work on your own. Do not contact prospects or partners, or publish as IncuBrix, except where your option brief allows it.
- No fake data, contacts, followers, engagement or results. Follow privacy laws and platform rules.
- Your work stays yours. If IncuBrix wants to use it beyond evaluation, we will agree terms with you in writing first.

Questions? Reply to the invitation email. We answer within one working day and share useful answers with all candidates.
